## Experience

### Lagetronix 2023 - present

#### Front End Developer

- Optimized Load time of the web application project using memoization and code splitting of react apps leading to a 40% increase in load speed and improved user experience of end users
- Worked closely with multidisciplinary teams to elevate user experiences, leading to a notable 30% rise in customer satisfaction and a significant 20% improvement in customer retention.
- Built the frontend of a complex HMS project with edge-cutting technologies that increased project security by 30%, user experience by 45% with modern designs and page load speed using React and Tailwind
- Implemented responsive, user-centric web interfaces using React, Typescript, Tailwind, Redux, HTML, CSS, and JavaScript; enhanced user experience for SaaS products, resulting in a 25% increase in user engagement and a 15% decrease in bounce rate.

### Lagetronix 2023

#### Front End Developer Intern

- Built, optimized, and managed front-end functionalities and API integrations of more than 4 of the company's web applications, and maintained them whilst ensuring scalability and optimization
- Managed 3 new and 2 existing projects and maintained clean code for scaling and good user experience using technologies such as HTML, CSS, Javascript, React, Typescript, AngularJS, Git, Github, Bootstrap, and VScode
- Worked with best coding practices, using modern web technologies and optimization techniques to ensure good user experience for more than 1000 end users.

### AltSchool Africa 2022

#### Software Diploma

- Collaborated with a team of 6 to create a JavaScript application that allows users to identify their service provider by inputting their phone numbers in an input box
  - The project got approval and positive feedback from the overall project manager with a score rating of 85%
  - The project had more than 340 reviews from other software developers
- Built a bookstore API with NodeJS that handled CRUD functions with 15 standard NPM packages including validation using Joi, Security using helmet, JWT, and passport for authentication
- Created and Deployed a full stack Blogging Application as a challenge against over 437 co-workers and had a 72% score rating
  - Executed the project with more than 12 backend standard tools including Node.js, Express.js, MongoDB, and JavaScript with JWT authentication strategy and EJS with Bootstrap for the UI
- Completed 100% of tasks and challenges from the organization with good feedback and accolades

## Software Developer 2021

### Freelance

- Developed a budget app for a client, achieving an 85% satisfaction rate upon project completion.
- Worked on a Fullstack social media app using modern tools like React, React-Redux, Node, Express, and MongoDB, resulting in a 25% improvement in load speed post-optimization.

## Skills

- Technical Skills: React, JavaScript, TypeScript, React-Native, HTML, CSS, Node.js
- Libraries: Redux, Tailwind, Express.js, Chakra UI, Material UI, NextJs, ChartJs
- Tools and Platforms: MongoDB, Git, Webpack, Vite, Netlify, Supabase, Vercel

## Education

### DIPLOMA IN BACKEND ENGINEERING 2022

AltSchool of Engineering

### NYSC CERTIFICATE 2022

ONE YEAR NATIONAL SERVICE

## Licenses & Certifications

### BACKEND ENGINEERING DIPLOMA
